

NMR FOR INDUSTRY

Discover what NMR can do for your business

DATE: 5th September 2016

TIME: 10 am - 4.30 pm

VENUE: Cottrell Building, University of Stirling, Stirling FK9 4LA

TOPICS COVERED

- Introduction to liquid-state NMR
- Introduction to solid-state NMR
- Bringing NMR to your lab bench
- Industrial applications of liquid- and solid-state NMR
- Accessing NMR facilities in Scotland

NMR is a non-destructive, fast and highly informative technique. It is an essential analytical method for chemical, material and biological science.

This workshop is aimed at industrialists who are keen to learn more about NMR theory and practice and to understand what the technique can do for their businesses.

To register for the workshop, visit the website:
